

HOUSE HOLD INVERTER PUMP

BPS SERIES

Power: 2w-1000w
Frequency: 50hz-60hz
Voltage: 160-250
Insulation: crass F
Protection: IP55

- The system uses rare earth permanent magnet synchronous motor, ultra-high energy efficiency and ultra-low power consumption.
- Lower to 1W standby power to fully present the energy-saving technology.
- Adopt the non-inductive world's forefront VFD motor driving technology to fully achieve zero maintenance of motor system.
- Full comply with the high design standards and manufacturing requirements of European Union and United States for product safety and environmental protection.
- The impeller adopts reinforce PPO, with copper embed structure to make it firm and durable.
- The rotor shaft adopts stainless steel butt welding technology to ensure that the wetted parts would not rust.
- The diaphragm in the integrated pressure tank adopts IIR material to ensure well sealing.
- The simple LED digital display with robustic design, to ease the user for operating.
- Adopt the pressure sensors of world-class brands to ensure the reliability of the system.
- The system is integrated with th reverse check valve structure, so that the internal pressure can be maintained under the condition of non-water use in the pipe network system.

TECHNICAL DATA

MODEL	MOTOR (KW)	MAX RATED (m ³ /h)	MAX HEAD (m)
